THE SCHOOL

Meridian Public School, has imprinted a name for itself, as a house of belief that learning comes from personal encouraging the natural curiosity of young minds. At Meridian, we guarantee the overall development of each of our students through the physical, mental and spiritual development of their senses.

With a capacity to house about 1000 students, the school offers education from pre-primary to Grade 10 to a cross cultural mix of students. The medium of instruction is English. Our school buildings provide an exceptional learning environment for sustainable development. Our children learn to respect the wisdom of traditional systems and see how these are brilliantly adapted for twenty-first century needs.

VISION

To develop young minds who think, question and are curious, through enquiry based learning shall promote educational excellence, physical fitness, spiritual and moral health, social perception and concern for environment through our own systems and practices.

MISSION

It is our mission to blend the strong cultural fundamentals of the traditional educational heritage with advanced modern learning tools, thus providing a new direction in education.

LEARNING IS AN ONGOING PROCESS

If there is anything science has taught us, it is that you never know when you might stumble upon your next great idea. This brings us to realize that learning a theory is very different from understanding it or implementing it. This allows the students to push themselves to the next level of learning.

MERIDIAN has a fully creative curriculum which is not only stimulating and relevant to the 21st Century, but also exceptionally meticulous in its approach.

Learning is an ongoing process and our curriculum lays emphasis on this, through its innovative assessment and recognition of continuous effort, rather than only the final examinations. And that's not all. Our curriculum has been devised keeping in mind the requirements of students from different backgrounds. It helps them to explore concepts, ideas and issues that have local and global significance.

Assured, Excellent Learning for Every Child!

LEAD School is an Academic Excellence System with a mission to empower India by making excellent education, accessible and affordable to every child. We run our own schools and partner with affordable private schools to improve the learning outcomes of students in order to develop them into capable adults, responsible citizens and good human beings. We are a team of intensely committed ignited beings. An ideal LEAD Schooler is a strong blend of professional competence and personal commitment to the cause of excellent education. The unique programme ensures excellent learning and skill development opportunities for the budding talents.

SOWING SEEDS OF LEARNING

THE LITTLE KINGDOM

We at Meridian Little Kingdom, we follow the teachings and principals of Maria Montessori, Play way method and Waldorf Education through well prepared environments that meet the needs and challenges of all children.

The Montessori approach was designed to help children grow by letting them explore the world around them. Classrooms are called "prepared environments" where children's innate zeal for learning is encouraged allowing them opportunities to choose among an array of purposeful activities to work on with the guidance of a trained adult. The method is based on the child's imperious need to learn by doing and has a profound respect for the child's personality. It enables the teacher to deal with each child individually in each subject.

FACULTY

The school is led by an extremely talented team of teachers from across the country. Each one of our teachers has an innate passion, not just to teach, but also learn. Our teachers are skilled instructors - in knowledge, in flexibility, in commitment and in motivational skills and they realize this passion by engaging commitment people. Being with them, living their lives, understanding them, before making them understand the lessons of life. Their flexible student-centred approach facilitates learning in its truest sense.

The school also strongly believes in developing its teachers and encouraging them to enhance their skills. The school conducts in-house training programmes to share best practices and arrange experts to run workshops.

ENVIRONMENT IS THE THIRD TEACHER

At Meridian, we believe that the environment is the third teacher. Our school environment is richly and carefully resourced to stimulate learning and development in young children. Our school is housed in specially renovated premises with child-safe interiors, child-friendly furniture and amenities. We have resourced toys and other play equipment from all over the world to enhance your child's learning journey, making it a joyful experience. Our large classrooms and learning centres are resourced with developmentally appropriate books, toys and equipment. Children have the freedom to explore these learning centres to facilitate holistic development.

Learning is not confined to the classrooms; it spans all available resources, including the natural environment outdoors and the local community. We provide ample outdoor space which makes outdoor learning an integral part of the children's day-to-day curriculum and provides opportunity to engage with the natural environment, supporting large muscle development and encouraging

MULTIPLE INTELLIGENCE APPROACH

Every student is unique in her own way. Different individuals have different aptitudes. Which is why, we at Meridian employ the multiple intelligences approach. This method helps us distinguish the different aptitudes within each student. In a class situation, this approach allows students to benefit from each other's strengths and to develop their competence.

SOCIAL BEHAVIOURAL COUNSELLING

A person's behavioural traits and outlook towards life is a much a mirror of his personality as his intellectual capabilities.

We make sure that no matter what their age, they should be able to hold conversations with people from every walk of life.

They should feel at ease and handle all situations with social graces imbibed at school. With our social behaviour counselling, our students are equipped to be their own agents.

There is no doubt that the goal of every human being is to be happy. Children spend a major part of the working day, and the best and brightest part of their lives in school, then it follows that it must be the aspiration of every school to be happy place. From the moment a new student joins in Meridian School community we want them to feel a sense of happiness and belongings as this is essential to their future success.

CREATIVE ACTIVITIES

Every student has their own true calling. It is up to us to encourage that child to find it by guiding them. The child needs the outlet and we try to provide the platform.

Sports, art and music form an integral part of the Primary and Middle Years programme. The students participate in various creative activities through subject options, club activities and CAS (Creativity, Action, Service).

We encourage all students to explore their creativity, to present and perform. They are offered opportunities through regular assemblies, workshops and major public productions. In addition to these, we also invite established artistes to present their work at the school.
